Unlock Your Restaurant's Full Potential.

Whatever your restaurant needs, we have you covered. From pickup to catering, we have the tools to help you succeed.

Pickup

Your customers can order ahead and skip the line. All they have to show you is their order QR or code during pickup.

Catering

Yaha sets up a store for you with daily payouts so you can focus on your craft. Receive and manage large orders effortlessly.

Table Ordering

Allow your customers to order from your tables using Yaha QR codes and reduce order preparation times significantly.

Room Service

Enable hotel guests to order room service online, ensuring room identification for orders and providing real-time notifications on order status.

Who we are

We are a fast growing startup based in Toronto and Nairobi dedicated to transforming the ordering experience with innovative ordering solutions.

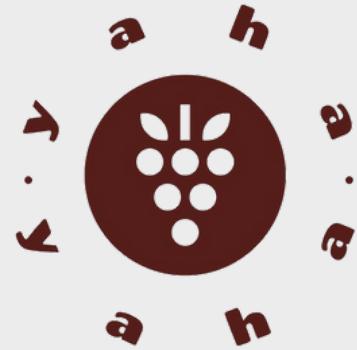

Our platform helps restaurants and hotels streamline operations and enhance customer satisfaction, whether through pickup, table ordering, catering, or room service.

Simple and Free Setup

Our team will build your store for you with your menu, which you can update anytime. We set up payments to your account of choice including all local banks in Canada & Kenya as well as mobile money.

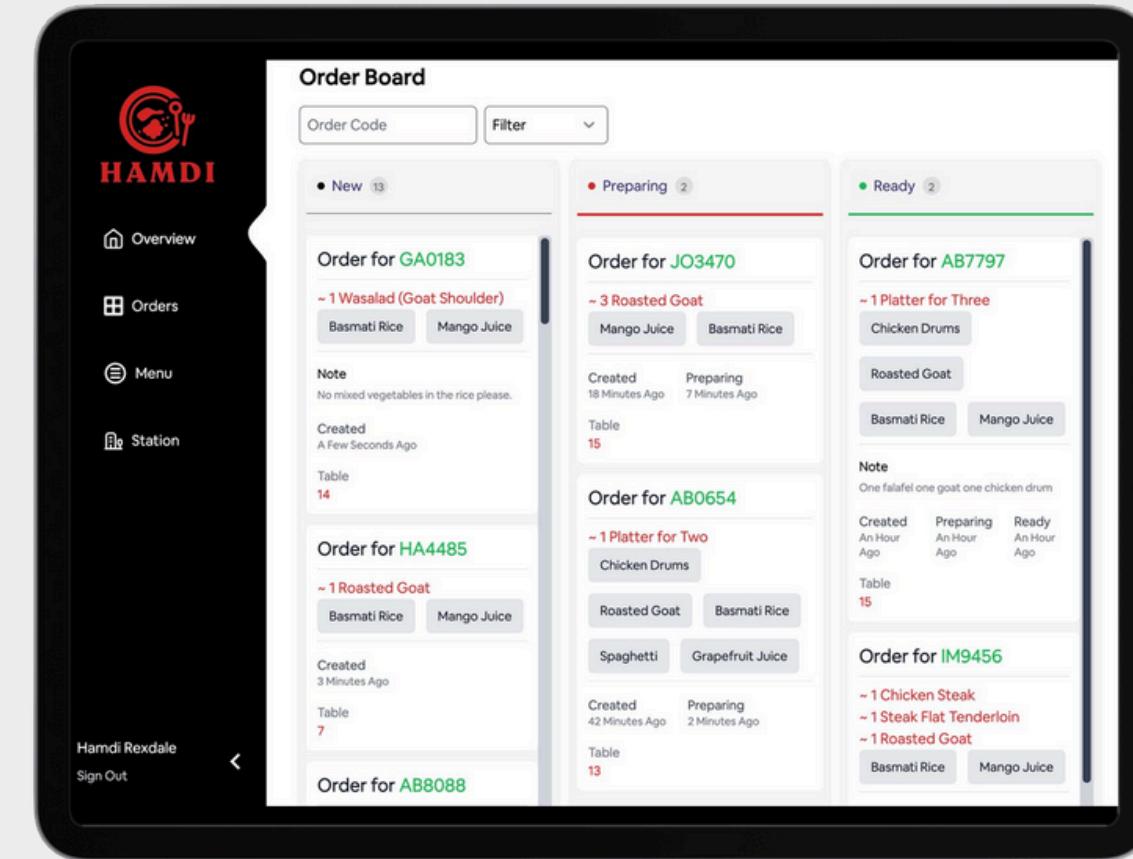

Profit-Friendly Pricing

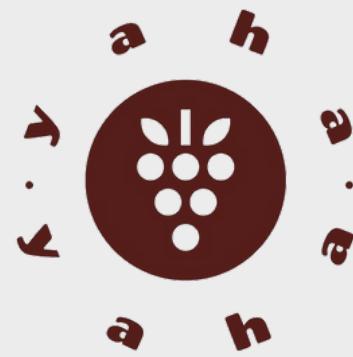

We don't charge for developing your storefront and branding it for you. We only charge a small fee of about \$0.35* per order, meaning we profit only when you sell, and there are no charges when you don't.

How we Work

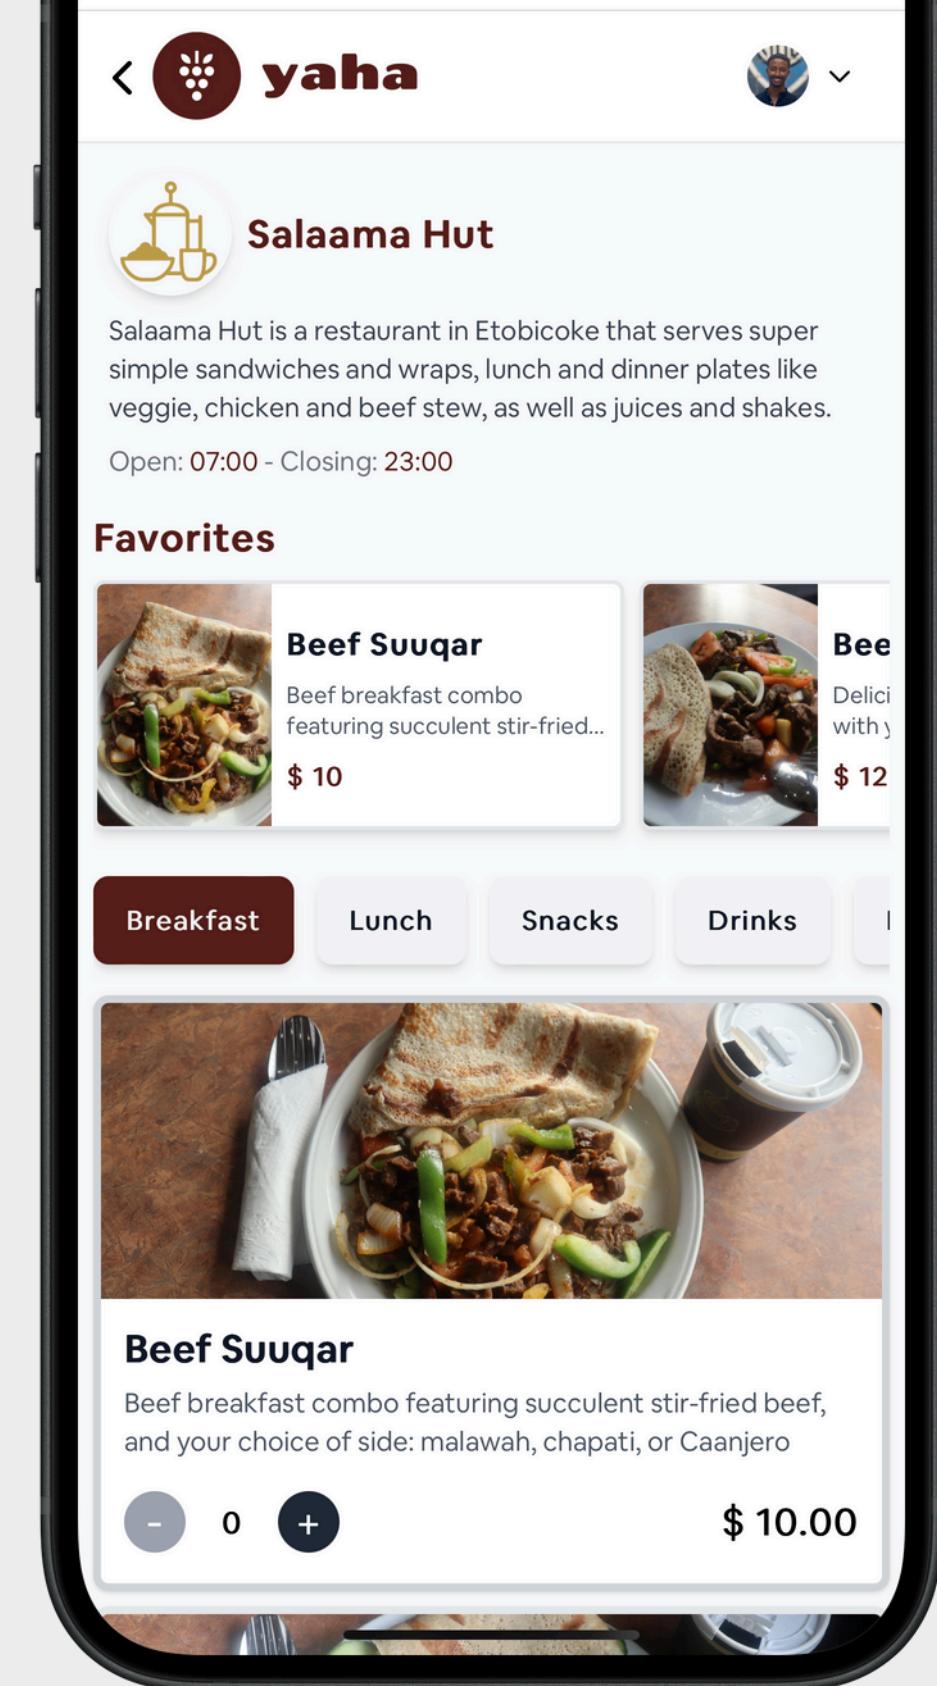

Customers place an order on your storefront, accessible through your link or QR codes. They place an order and pay. You will be notified of new orders to start preparing, and the user will be notified when their order is ready.

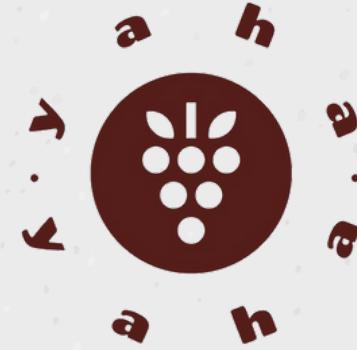

Fully Customized Store Front

We create and deploy a branded website for your restaurant that displays your menu to customers, completely free of charge!

Pickup Service

Customers can skip the line at your restaurant or store by ordering ahead through Yaha. Regular customers have access to their previous orders for faster reordering.

Order Dashboard

Easily manage all your orders in one centralized dashboard. Whether customers order from your tables, for pickup, or delivery through your custom website, all orders are organized seamlessly. Our user-friendly interface allows you to efficiently handle new, preparing, and upcoming orders, ensuring a smooth and streamlined workflow.

The smartphone screen shows the 'Order Board' interface for the 'HAMDI' restaurant. The top navigation bar includes 'Order Code' and 'Filter' buttons. The main area is divided into three sections: 'New' (13 orders), 'Preparing' (2 orders), and 'Ready' (2 orders). Each section lists individual orders with details like item descriptions, side items, notes, creation and preparation times, and table numbers.
